

Secure and Protect Content

New Premiums and Freemiums

Introducing Premium and Freemium content on LearnCast®! You can now categorize course materials as Freemium or Premium. This means only users with the required authentication will be able to view Premium content, while any user will have access to Freemium content.

Great Ideas for Premiums and Freemiums:

- Product releases with basic and advanced specifications
- Training programs with introductory and advanced courses
- Announcements with group specific information

With Premiums and Freemiums you can finally target and draw in your audiences like never before.
